

Hiacc®

NABL ACCREDITED

ENVIRONMENTAL TESTING LABORATORY

Environmental, reliability, and validation testing

Test Smarter. Build More Reliable Products

HIACC Test Lab (Bengaluru) helps industries and startups validate product reliability under temperature and humidity stress—reducing failures and speeding up approvals with clear test reports.

Backed by 10+ years of environmental test chamber manufacturing expertise, HIACC also guides the right test conditions and setup for real-world results.

Trusted by Leading Brands

Manufacturers and innovators who rely on HIACC for testing, validation, and chamber expertise

*Shown here are select customers; HIACC supports a broad and growing base of clients across industries.

TEST LAB Capabilities

TEST PROFILE

- ✓ Temperature Cycling Test
- ✓ Thermal Shock Test
- ✓ Damp Heat / Humidity Test
- ✓ Environmental Stress Screening (ESS)
- ✓ Vibration & Mechanical Shock (Sine, Random, Shock) & Drop Test
- ✓ High Temperature / Low Temperature Test
- ✓ Rapid Temperature Change

TEST STANDARDS

- ✓ QM Standards
- ✓ ISO Standards
- ✓ IEC Standards
- ✓ MIL Standards
- ✓ JIS Standards
- ✓ JSS Standards
- ✓ IS Standards

THE HIACC Advantage

- Strict Data Confidentiality
- Fast Report Turnaround
- Frequent Testing Updates
- Zero Downtime Assurance
- Immediate Slot Availability
- Certified Engineers
- Sample Pickup & Return Support

AUTOMOTIVE TESTING

ELECTRONICS TESTING

DEFENCE TESTING

AEROSPACE TESTING

POWER TESTING

FMCG TESTING

ONE-STOP TESTING SERVICES

End-to-End Reliability & Validation Testing

EMI / EMC TESTING
Testing support to assess electromagnetic compatibility and interference behavior of electronic products and systems

E-VEHICLE MOTOR PERFORMANCE & RELIABILITY
Environmental reliability & validation testing under controlled stress conditions to assess motor behavior, efficiency, and reliability

BATTERY TESTING (SAFETY & RELIABILITY)
Testing support to evaluate battery safety and reliability performance under different environmental conditions

HIGH & LOW ALTITUDE TESTING
Simulated altitude conditions to evaluate performance and reliability impacts due to pressure/temperature variation

INGRESS PROTECTION (IP) TESTING
Dust and water ingress validation to confirm enclosure protection levels as per required IP rating

CORROSION TESTING
Salt spray / cyclic corrosion testing to evaluate material/coating resistance in harsh environments
